English Language

PROJECTS

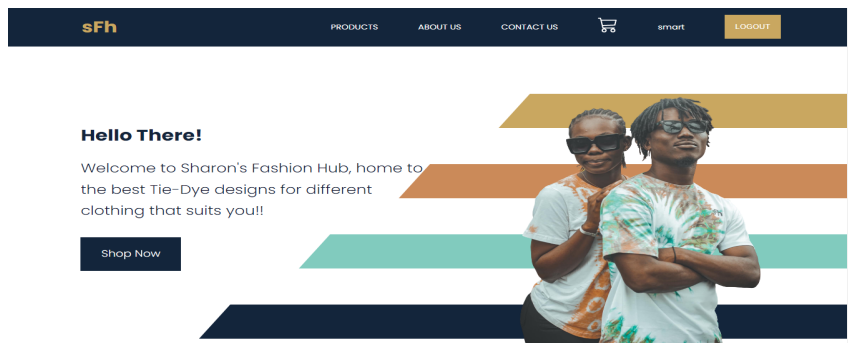

E-Commerce Website

Built an e-commerce website for the Sharon Fashion Hub Brand to enable the brand to reach more people and increase their revenue and also make sales as easy as possible.

I worked on both the frontend and backend

Frontend: React

Backend: Django

Github Link: frontend – <https://github.com/yhtiee/React-E-Commerce-Website-Clothing>

Github Link: Backend – <https://github.com/yhtiee/React-Ecommerce-website-Backend-Using-Django>

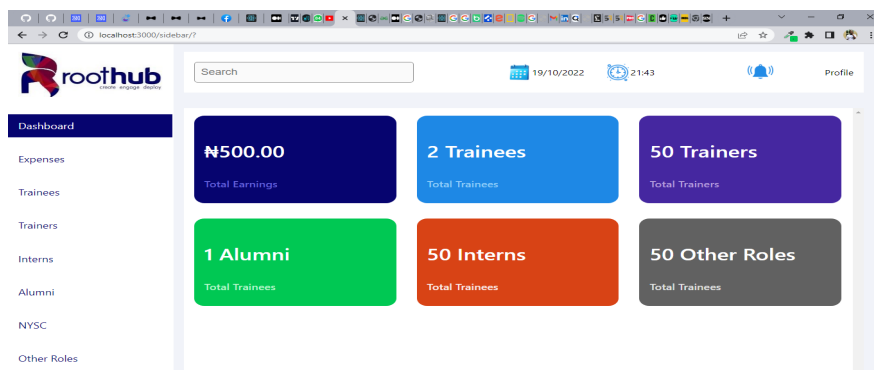

Roothub Management System

Built a Management System to be used by the HR of the Roothub to be able to keep track of the number of students at each branch and also record the growth in profits made within a specified period of time. Hr can carry out major CRUD functionalities and also view the analysis carried out by the software.
